

1. Purpose

A primary goal of CCP-Essentials is to be inclusive to our community of cybersecurity specialists with the most varied and diverse backgrounds possible. As such, we are committed to providing a friendly, safe and welcoming environment for all, regardless of gender, sexual orientation, ability, ethnicity, socioeconomic status, and religion (or lack thereof).

This code of conduct outlines our expectations for all those who participate in our community, as well as the consequences for unacceptable behavior.

We invite all those who participate in CCP-Essentials to help us create safe and positive experiences for everyone.

As a course designed to protect our National Security you promise to participate in your fullest. You will complete class assignments on time, reflect on your learning, engage in writing, and engage in critical analysis of both written and spoken word. You understand that success in this class requires meeting these basic expectations.

We seek to create a community that recognizes and celebrates the creativity and collaboration of introspective experts who seek better risk management through consensus and community building.

Listening, not lulz, leads to improved cybersecurity.

Thus, we seek to honor the diversity of people, cultures, and opinions brought to the CCP-Essentials community.

CCP-Essential spaces are inclusive environments, based on treating all individuals respectfully, regardless of gender (including transgender status), sexual orientation, age, disability, medical conditions, nationality, ethnicity, religion (or lack thereof), physical appearance, politics, ideology (real world or tech), or software preferences.

We value respectful behavior above individual opinions.

Respectful behavior includes:

- Be considerate, kind, constructive, and helpful.
- Avoid demeaning, discriminatory, harassing, hateful, or physically threatening behavior, speech, and imagery.
- If you're not sure, ask someone instead of assuming.
- Saying sorry when needed
- Not saying sorry because society expects you to.

Our cybersecurity courses prioritize marginalized people's safety over privileged people's comfort. CCP Essential organizers reserve the right not to act on complaints regarding:

- 'Reverse' -isms, including 'reverse racism,' 'reverse sexism,' and 'cisphobia'
- Reasonable communication of boundaries, such as "leave me alone," "go away," or "I'm not discussing this with you."
- Communicating in a 'tone' you don't find congenial
- Criticizing racist, sexist, cissexist, or otherwise oppressive behavior or assumptions

2. Your Control Your Data

You interact with this class from Microsoft Teams. You own all your data. You may choose SCSU to delete all of your data.

You also have access to a 90 Day subscription to an encrypted file sharing service. Even our administrator cannot see the encrypted files if you do not share. All assessments will be delivered via that platform. After 90 days you can choose to delete the file sharing account or we will transfer ownership and you can keep the account (if you pay).

We encourage learners to share their artifacts in Microsoft Teams with the class but you always have the option of using our encrypted file sharing tool and sharing it only with the instructor.

If you choose to develop a project for class you own all IP related to your creation. Southern Connecticut State University makes no claim to your stuff. We will help you make it cool.

3. Right to Privacy

If you question whether something could violate privacy you already have your answer. Learning takes trust and word is bond. Keep conversations in class.

While this class is built on and encourages open pedagogy you will never be required to share any task or assignment.

You may encrypt any assignment and share it with just the instructors for feedback. You are encouraged to share your thinking with the class so we can weave understanding together. You have the option of using Microsoft Word within Teams or embedded in our encrypted file sharing system.

Remember not all of us have the luxury of living out loud online. For many being public is bad risk management.

4. Public, Private, and Open

What does public and "in the open" mean?

Online communication, such as tweets, blog posts, and comments are generally out in the open and technically "public" and available for researchers to analyze and quote. Internet researchers have, however, documented how a particular communication may be technically public but viewed by the individual who posted it as meant for a more limited or private context.

Nothing in this class should be considered public. Joining class requires user authentication so an expectation of privacy exist.

Even if an individual feels that they have "published" in public or have consented to be part of research, they might still feel like trust has been violated if their words are taken up and re-framed in a way that they feel is out of context or misrepresented.

The expectation, given access requires expectations, is that anything shared in this class is private and should not be shared outside of class without permission and consent from the person who created the idea or artifact.

5. Expected Behavior

The following behaviors are expected and requested of all community members:

- Participate in an authentic and active way. In doing so, you contribute to the health and longevity of this community.
- Exercise consideration and respect in your speech and actions.
- Attempt collaboration before conflict.
- Refrain from demeaning, discriminatory, or harassing behavior and speech.
- Provide feedback to your peers
- Answer questions when you can and help point people in the right direction when you can't

6. Unacceptable Behavior

The following behaviors are considered harassment and are unacceptable within our community:

- Violence, threats of violence or violent language directed against another person.
- Sexist, racist, homophobic, transphobic, ableist or otherwise discriminatory jokes and language.
- Posting or displaying sexually explicit or violent material.
- Posting or threatening to post other people's personally identifying information ("doxing").
- Personal insults, particularly those related to gender, sexual orientation, race, religion, or disability.
- Inappropriate photography or recording.
- Incessantly correcting grammar
- Inappropriate physical contact. You should have someone's consent before touching them.
- Unwelcome sexual attention. This includes, sexualized comments or jokes; inappropriate touching, groping, and unwelcomed sexual advances.
- Deliberate intimidation, stalking or following (online or in person).
- Advocating for, or encouraging, any of the above behavior.
- Sustained disruption of community events, including talks and presentations.

7. Consequences of Unacceptable Behavior

Unacceptable behavior from any community member, including sponsors and those with decision-making authority, will not be tolerated.

Anyone asked to stop unacceptable behavior is expected to comply immediately.

If a community member engages in unacceptable behavior, the community organizers may take any action they deem appropriate, up to and including a temporary ban or permanent expulsion from the community without warning (and without refund in the case of a paid event).

7. No Notification Policy

When in class we would never ask you not to have a laptop or cell phone. That contains way more computing power than we took to the moon. We do ask for attention. So do a lot of companies who drill into your brain through notifications.

We ask that when in class you globally turn off notifications. When working online dedicate yourself to class. Shut down any sms notifications, close all social media tabs not related to class, and learn. Notifications work like drugs. Literally. Brain scientists work for companies and study how to make you click more. Stay attention sober during class.

8. No Driving

You are expressively forbidden to complete any activity or interact with any other person in this class while operating a vehicle. Doing so puts others at risks and therefore falls under unacceptable behavior. Plus, its illegal (in Connecticut), so there is that too.

9. Video Data

If this class involves video projects you will never be required to show your face. If you do a group project all group members must consent before a video upload. Any group member has the right of refusal. You can email mcverryj1@southernct.edu if your would like to ask for a video removal without letting your other group members know.

10. Reporting Guidelines

If you are subject to or witness unacceptable behavior, or have any other concerns, please notify a community organizer as soon as possible.

lancorl1@southernct.edu

Lisa Lancor

Additionally, community organizers are available to help community members engage with local law enforcement or to otherwise help those experiencing unacceptable behavior feel safe. In the context of in-person events, organizers will also provide escorts as desired by the person experiencing distress.

7. Addressing Grievances

If you feel you have been falsely or unfairly accused of violating this Code of Conduct, you should notify lancorl1@southernct.edu with a concise description of your grievance. Your grievance will be handled in accordance with our existing governing policies.

8. Scope

We expect all community participants (contributors, paid or otherwise; sponsors; and other guests) to abide by this Code of Conduct in all community venues—online and in-person—as well as in all one-on-one communications pertaining to community business.

This code of conduct and its related procedures also applies to unacceptable behavior occurring outside the scope of community activities when such behavior has the potential to adversely affect the safety and well-being of community members.
